**COMMERCIAL MAGNETIC FLEXIBLE MULTI-COLORED  
EXTERIOR NEON LIGHTING**

22553 U.S. PTO  
10/762999

012304

**DESCRIPTION:**

Exterior lighting will be sold in lengths varying from 3 feet to 35 feet. This product will be available for small, medium, large, and heavy-duty commercial vehicles. It will also be an asset for boats, trailers in tow, and lawn and garden equipment. It will be useful in both highway and local usage. Wire harness will be equipped for multi-use power sources.

**PURPOSE:**

The ultimate purpose of this product is to improve the safety of those traveling on our highways, and local streets, and to prevent as many accidents as possible.

**EXPLANATION:**

The commercial magnetic flexible multi-colored exterior neon lighting will be most beneficial in preventing accidents involving personal vehicles and commercial vehicles such as tractor trailers, buses used for public/private transportation, and emergency vehicles as well. This product will be beneficial in all weather types including fog and rainy weather. It will be available in flexible lighting as well as standard fender side railing. Also all around trailers-tailights, and side-lighting.

The inspiration for this product came after much thought and experience with accidents, and near accidents, which seemed to have had the possibility of being prevented had there been proper or additional lighting on the commercial vehicles involved. Most of these incidents occurred at night, which is a time when they are not as visible. Using commercial exterior neon lighting will insure, better visibility for vehicles coming in contact with commercial vehicles, therefore reducing the number of accidents, and traffic fatalities.

The PTO did not receive the following  
listed item(s) Sheet of Transmittal

I , Frederick Gober, claim ownership of commercial magnetic flexible multi-colored exterior neon lighting.

I, Fredrick Gober claim priority to provisional case number 60457364, for which the original filing date is March 26, 2003. This case number is for Commercial Neon Lighting, which will be beneficial in motor vehicle accident prevention. This product featuring the neon lights will enhance visibility of commercial vehicles, which will aid in these over-sized vehicles being more visible and therefore, deter traffic accidents.
